Everyone loves treehouses ...

What is it about a treehouse that is so universally appealing? Even if you didn't have one as a child yourself, you probably wanted one. As a space outside of the family home, treehouses tap into that innate childhood desire to create a little secret space for oneself; from a simple tent or blanket fort that you make yourself, to an elaborate outside playhouse that a parent may have helped you create.

Treehouses represent fun, creativity and imagination all in one secret space built just for you (and maybe a few of your friends)!

This is why we are so happy to present the LEGO® Ideas Treehouse. So now, even if you didn't have one yourself when you were a kid, you can build the dream that you will never grow out of.

Plants from Plants

During 2018, the LEGO Group began making botanical elements, including trees, leaves and bushes, from a plant-based polyethylene plastic, produced using sustainably sourced sugarcane.

These elements represent the first milestone in the LEGO Group's ambitious commitment to making products using sustainable materials by 2030.

The LEGO® Ideas Treehouse uses over 180 botanical elements in the foliage of the tree, making this set the largest collection of LEGO elements made from sustainable sources to date.

The LEGO Ideas Treehouse celebrates the endless creativity unique to the LEGO system-in-play and represents both the beauty of the natural world, and the LEGO Group's sustainable materials challenge.

www.LEGO.com/plantsfromplants

Meet the maker ...

Kevin Feeser, Fan Designer

The person behind the original Treehouse design is Kevin Feeser, a hairdresser and huge LEGO® fan from France. Not just creative by profession, Kevin is an avid lover of design, architecture and nature, all of which merges together in his awesome treehouse creation. Here is more from the man himself ...

“I’m passionate about nature, wildlife and wooden constructions. So the idea for the model emerged during an unusual weekend with friends in Robinson Crusoe-style treehouses. The tree trunk was the most difficult part of the model to get right, because it had to be robust enough to support three shacks while using the least number of elements possible! Also, the shacks were a challenge ... there had to be a lot of details, and bridges and stairs between each hut, as well as an overall round shape.

It took about two months (about 300 hours) to complete the model. I remodeled the whole project six times (trunk, shacks, roofs, leaves, etc.) in designing my final creation. When I saw that I had reached the magic 10,000 supporters in less than 4 months, I was very proud and really happy! I always believed in my creation but didn’t expect it to reach the 10,000 supporters so quickly.”

To create a successful LEGO Ideas product idea:

“Be creative - check out what’s out there ... and then do something entirely different.

Be inspired - put together a portfolio of real things (photos, drawings, etc.).

Be prepared - source the right elements, visit the LEGO Pick-a-Brick website, etc.

Finally, carefully read the LEGO Ideas rules. From my own experience, I misread the rules and I had to remodel my whole design to use less than 3,000 LEGO elements!”

Meet the LEGO® Designer

César Carvalhosa Soares

"I loved treehouses as a kid, and still dream of having one in my backyard one day. In fact, when I applied to become a designer at the LEGO Group, my portfolio contained a couple of treehouse builds. So ever since Kevin's original treehouse submission got the required 10,000 supporters, I was rooting for it to be picked and made as an official set. Having the opportunity to work on this project was really special.

This project was different to my previous work, which was mainly on LEGO® *Star Wars*™, because the build is so organic and there was room for creative freedom.

My role was to pick up the original submission and adapt and tweak it to match the high quality standards of the LEGO brand. Things like the stability of the model, the overall aesthetics, the build flow and playability of the model had to be considered.

The most challenging part for me was making the roofs removable so that the cabins could be accessed. The solution was to create the entire last third of the tree as one removable part.

Kevin came to Billund, so we had the chance to collaborate closely and discuss some points regarding the treehouse design. This really helped create a set that would meet both his expectations but also the LEGO brand standards.

What I love about the treehouse is the bit of landscape with the little stream, the way that all the cabins have different details and also the fact that there is no "back side" to the model. There is almost the same amount of detail and intricacy from every angle that you look at. But the thing that I'm really proud of is the fact that you can swap the colors of the leaves to match different seasons with pieces from just one set. I suggested this option so I'm super happy that we could make it happen."

IDEAS[™]

Do you like this LEGO® Ideas set?

The LEGO Group would like your opinion on the new product you have just purchased. Your feedback will help shape the future development of this product series.

Please visit:

[LEGO.com/productfeedback](https://www.lego.com/productfeedback)

By completing our short feedback survey, you will be automatically entered into a drawing to win a LEGO® prize.

Terms & Conditions apply.
